The Energy Saving Grant has been made possible thanks to funding which has been allocated to Sport Wales by the Welsh Government.

What is the funding for?

- Solar panels
- Insulation/building fabrics
- Lighting (excluding playing/training floodlights)
- Improved heating and hot water systems (not for catering-only purposes)
- Sustainable water sourcing

How do clubs apply?

Clubs can fill out the Expression of Interest form available on the [Sport Wales website](#) between 22 May 2024 and Wednesday 26 June 2024. If the club is eligible, they will be invited to complete Stage One of the Application Form.

Applications may be submitted in Welsh or English.

Who is the fund for?

The Energy Saving Grant is for not-for-profit clubs or community organisations in Wales with a project or activity that:

- Has not yet started
- Will take place in Wales and be mainly for people who live in Wales

Freeholder or leaseholders only will be able to apply (if leaseholder, must be minimum 7 years remaining and will need written consent of freeholder). We are also encouraging sports clubs with joint facilities to work together on a joint application.
